LOCATION

Lizard Island is Australia's northern most island beach resort, located 240km north of Cairns on the Great Barrier Reef, fringed by coral gardens and ribbon reefs.

Access to the island is by one hour scenic flight from Cairns, over the reef, landing on the island's private airstrip.

HISTORY

Lizard Island was discovered by Captain James Cook in 1770 when his vessel, The Endeavour, ran aground on a nearby coral reef. The crew spent nearly two months on the island repairing the damaged ship. Cook made his mark on the island, naming "Cook's Passage", "Cook's Look" summit and the adventurer named the island - Lizard Island - after the resident monitor lizards.
